2. Product Description

	Article	Engineering semi-finished product	
	Abbreviation	PE-ELS	
	Material characterization	Thermoplastics	
	Main components	Polyethylene high density, electrostatic conductive contains pigments, stabilizers and additives	,
	Marking obligation components	None	
	Classification according to REACh	Product	
3.	Product Properties		
	Form / Condition	Rods / Solid	
	Colour	black	
	Odour	close to odourless	
	Density	$0,9 - 0,97 \text{ g/cm}^3$	
	Melting temperature	50 - 140 °C	
	Thermal decomposition	> 360 °C	
	Ignition temperature	- °C	
	Solubility in water	insoluble	
	Risks	no special risks for humans or animals	
Geł	nr GmbH	T: +49 – 621/87 89 - 0	Page 1/3

4.	Handling	and	Storage	
----	----------	-----	---------	--

	Machining	The product can be machined with standard machinery and tools. Before machining the product should be stored at room temperature 24 h. Evacuate swarf to prevent slipping or tripping. Observe the maximum allowable concentration of dust levels on the working area which apply in your country. Wear safety goggles during machining. General dust limit value: Respirable dust (6 mg/m3); Inhalable dust (10 mg/m3)	
	Storage	The products shall be stored indoor to keep away from any source of degradation such as sunlight, UV-jets, ionizing radiation, chemicals,	
	Safety measures	The general industrial safety measures should be considered. A thermal damage during machining should be avoided.	
5.	Fire-fighting Measures		
	Suitable extinguishing agents	Water spraying jet, foam, dry chemical, carbon dioxide (CO2)	
	Potential combustion products	Carbon dioxide (CO ₂), carbon monoxide (CO), Formation of further decomposition and oxidation products depent upon the fire conditions. Under special fire conditions traces of other toxic substances are possible	
	Special protective equipment	Wear a self-contained breathing equipment.	
	Further information	Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.	
6.	Disposal Considerations		
	European waste catalogue	 According to the "European Waste Catalogue and Hazardous Waste List" uncontaminated waste from the products is not classified as hazardous. Following code numbers can be used: 070213 waste plastic from manufacture, formulation, supply and use of plastics, 120105 plastic shavings and turnings 57129 other cured waste plastics (Austria) 	
	Waste disposal	If recycling is not possible, waste disposal by landfill or incineration in compliance with state and local regulations. The product do not contain pigments or stabilizers based on cadmium. The product is not biologically degradable, but based on the present state of knowledge no negative effects on the environment may be anticipated.	

7. Marking and Guidelines

Marking in accordance EEC guidelines	Not subject to labelling.
Other guidelines	None
Transport regulations	Not classified as hazardous good under transport regulations.

8. Other Information

According EG directive 1907/2006/EG (REACh), our products are clearly defined as articles, exempt from registration. The European regulation (EV) about chemicals, which came into force June 1st, 2007, prescribes Material Safety Data Sheets (MSDS) only for dangerous substances and preparations. According REACh we are manufacturing articles and we are not required to issue MSDS.

All above mentioned information are based according to today's state of knowledge and supply no warranty of quality. Existing laws and regulations must be observed by the recipient of our products on his own authority.
